

THE
Mathematics Student

*A Quarterly Dedicated to the Service of Students and
Teachers of Mathematics in India*

Vol. XIV
1946

PRINTED AT THE BANGALORE PRESS, MYSORE ROAD
BANGALORE CITY
1948

CONTENTS

Vol. XIV

	PAGE
Bambah, R. P.: On integer cube roots of the unit matrix	69
— and Chowla, S.: Some new congruence properties of Ramanujan's function $\tau(n)$	24
Bhutalingam, K.: Test for divisibility by numbers ending in 9	36
Chowla, S., and Nasir, A. R.: Numbers represented by a ternary quadratic form	23
Ganapāti Iyer, V.: A mean value theorem and its applications	81
Kadian, S. S.: Numbers represented by a ternary quadratic form	22
Kesava Menon, P.: A note on the equation $a^m x + b^n y = 1$	29
————: Extension of Pascal's Theorem	30
————: Some diophantine equations	65
————: On the equation $ax^2 \pm by^2 = cz^2$	77
Kerawala, S. M.: Residual types of partitions of "0" into 4 cubes	28
Kosambi, D. D.: The law of large numbers	14
Levi, F. W.: Triangulation with acute angled triangles	27
Luther, R. S.: Solution of the cubic equation by inspection	32
Mahajani, G. S.: Generalization of the law of the mean	86
Panagat, G. A.: Reimann integral as the limit of a product	32
Purushotham, S.: On finding a particular integral of a linear differential equation with constant coefficients	33
Rajagopal, C. T.: On the remainder in Taylor's theorem	71
————: Concerning reciprocal screws	75
Richeson, R. W.: The condition of English mathematics from 1750 to 1850	49
Sastry, K. S. B.: The age of the moon on any day	38
Satyanarayana, K.: Partial fractions	34
Sen Gupta, B. K.: On the Caylean of a non-singular cubic	20
Seshagiri Rao, M. V.: Some kinetic equivalents of a right circular cone	94
Sharma, Prithvi Nath: On some vibrational problems	63
Suseela, Miss M.: Non-Desarguesian Geometry	1

	PAGE
Venkataraman, S.: On testing for divisibility by 7	37
Venkataraman, C. S.: A theorem on residues and its bearing on multi- plative functions with a modulus	59
Viswanathan, K. A.: A note on continued fractions	87
Vijayaraghavan, T.: Problems connected with courses of study in higher mathematics in Indian Universities	88
Iyer, V. G.: Some interesting problems and their solutions	39
Reviews—	
J. L. Coolidge : <i>A history of conic sections and quadric surfaces</i>	43
L. V. Gurjar : <i>Ancient Indian Mathematics and Veda</i>	45
M. V. Jambunathan : <i>Intermediate Geometry</i>	46
Kerkar and Kanitkar : <i>College Geometry</i>	46
Agashe and Chandratreya : <i>Plane Geometry for F.Y. Students</i>	46
H. D. Bagchi and B. N. Mukerjee : <i>Coordinate Geometry</i>	46
Santi Narayanan : <i>Analytical Solid Geometry</i>	46
L. Narayana Rao : <i>Perpetual Ephemeris of the Planetary Cycles</i>	95
D. E. Smith : <i>The Poetry of Mathematics and Other Essays</i>	96
D. E. Smith : <i>Portraits of Eminent Mathematicians</i>	97
H. W. Turnbull : <i>The Mathematical Discoveries of Newton</i>	97
P. A. Piza : <i>Fermagoric Triangles</i>	98
Gleanings	48
Announcements and News	47
